

SENSORS

Electronic Pressure and Temperature Sensors

PTSA PSA

- ❖ VERY PRECISE MEASUREMENTS
- ❖ PRESSURE AND TEMPERATURE SENSOR

Applications

Analogue pressure and temperature sensor specially designed to ensure a precise control of the pressure and the temperature of the water circuit of any type of gas-fired boilers.

Product & Points

This new sensor designed and manufactured by Jaeger Controls, offers the centralising of all control measurement in a small compact unit:

- ❖ Precise temperature measurement allowing a display and the regulation of the boiler.
- ❖ Precise pressure measurement allowing a display, completed by the safety function for lack of water.
