

THERMOSTATS

Room Thermostats

TA600

❖ HIGH PERFORMANCE

❖ PRECISE

❖ AESTHETIC

Applications

Ambient temperature control for individual houses, apartments or private dwellings.

Used for “ON/OFF” control.

- In hot water installations:
 - Wall mounted gas boilers
 - Floor standing oil or gas boilers
 - Pumps
 - Solenoid Valves.
- On electric central heating installations:
 - Convector or electric radiators
 - Power contractors.

Product & Points

The outstanding performance is due to the use of a sensitive element consisting of a membrane having a large exchange surface area and very low mass, operation being by vapour tension. This technology, combined with our know-how, symbolises the perfect balance between high technology and aesthetics.
