

# THERMOSTATS

Liquid Expansion Thermostats

**TX**

-30 to + 700°C

❖ HIGH PERFORMANCE

❖ PRECISE

❖ ROBUST

## Applications

Temperature Control of:

- All Types of Boilers
- Electric Radiators
- Ovens
- Washing Machines
- Air Conditioners, Fan Convectors

## Product & Points

This new generation of thermostats offers to the user particularly high-performance products, precise, robust, with high contact rating and easy to install. The production in charters plant, ISO9001 certified with increased automation and highly sophisticated production methods, ensure to these thermostats a remarkable and steady level of quality.

Special models, developed to customer specification, can be manufactured.
